LUBRICANTS

GENUINE VOLVO PARTS

**PERFORMANCE
UPTIME
PROTECTION**

VOLVO DESIGNED COMPONENT

Volvo invests heavily in the development of all its products – and Volvo Lubricants are no exception. They are designed and tailored to match the needs of Volvo machines - ensuring perfect harmony between components.

Choosing the best combination of lubricants to suit your machine ensures top performance and increased efficiency – while reducing wear and saving fuel, giving greater machine durability and machine productivity.

In the development stage, great effort is put on maximising shear stability and optimising service intervals, making sure uptime is at its best – both in the short term and long run.

MAXIMUM PERFORMANCE

The Volvo lubricants range includes oils that are designed to optimise performance and minimise fuel consumption. The specially-formulated oils keep machine components in top condition – even in the toughest environments – ensuring machines run better for longer.

To maximise oil drain intervals, the only way to go is Volvo Lubricants – the only fully-approved product range.

Proving the point

Volvo Lubricants are tested under the toughest conditions. From tropical heat to sub-arctic climate and at various altitudes. They are tested to work 24/7 – just like our machines. Volvo Construction Equipment spends more than 15 000 hours per year purely on development and test programs for Lubricants. Field trials are an essential component in lubricant development and many tens of thousands of test hours builds a statistical foundation which makes it possible to continuously improve the quality and for example extend drain intervals.

MAXIMUM PROTECTION

Volvo Lubricants keep your machine's performance at its best for longer – even in the most demanding environments – and by that you can enjoy the benefit of extended oil drain intervals, because now the Volvo lubricants are proven to last even longer.

Component protection and performance is maintained throughout the entire service interval and Volvo Lubricants allow your Volvo to operate as designed.

Shear stability of Volvo Automatic Transmission Fluid AT102, Viscosity at 100°C

MAXIMUM UPTIME

Machine downtime is a burden on any construction business. That's why Volvo Construction Equipment does all it can to ensure the uptime of your machines.

Volvo recommends that only its range of lubricants should be used for its machines because they are specifically designed to reduce wear, heighten performance and increase the productivity of the machines.

By using Volvo Lubricants you can benefit from maximised operational hours and reduced cost of machine maintenance and downtime.

COMPLETE PROGRAM

VOLVO CONSTRUCTION EQUIPMENT

Did you know...

- ▶ ...that Volvo Oil Analysis can be performed for your machines – a 'health check-up' that can provide early warnings about component health to reduce risk of unplanned downtime and expensive repairs
- ▶ ...that with a Customer Support Agreement your dealer will take care of the lubricants service and you can have Volvo Lubricants delivered at no extra cost*. Gain peace of mind knowing that your dealer will manage your services on time to ensure the maximum possible uptime of your machine.

*Exceptions apply in some markets

- ▶ ...with the Volvo Construction Equipment Telematics System, CareTrack, you can receive service reminders for lubricants services directly to your mobile phone or computer. CareTrack can also pre-alert you of machine error codes, avoiding unnecessary breakdowns and machine downtime.
- ▶ ...that Volvo Lubricants can be ordered in the same way as any other Volvo component and will be delivered on time at your convenience.
- ▶ ...that you can read more about each Volvo Lubricant in the Lubricants Pocket Guide and your dealer can support you with more information.

Volvo Construction Equipment is different. Our machines are designed, built and supported in a different way. That difference comes from an engineering heritage of over 175 years. A heritage of thinking first about the people who actually use the machines. About how to help them be safer, more comfortable, more productive. About the environment we all share. The result of that thinking is a growing range of machines and a global support network dedicated to helping you do more. People around the world are proud to use Volvo.

Not all products are available in all markets. Under our policy of continuous improvement, we reserve the right to change specifications and design without prior notice. The illustrations do not necessarily show the standard version of the machine.
